

IP44.DE Slat One

surface:
- anthracite
- brown
- grey
- white
- black

Technical Information

Manufacturer	IP44.DE
Designer:	Klaus Nolting
Year of design:	2018
Dimensions	H 5 cm B 9 cm L 22 cm
material:	aluminum, safety glass
dimming:	on site dimmable with a trailing edge dimmer
Wattage:	8 W
LED:	inclusive
Luminous flux in lm:	180
light distribution:	directly
Color temperature in Kelvin:	3,000 warm white
Energy class:	A+
Suitable for EEK:	A++, A+, A
protection:	IP65
Scope of delivery:	LED

Description

The IP44.de Slat One is a wall or ceiling lamp. The light distribution of this lamp can be adjusted again and again, since the diffuser can be rotated infinitely by 240 degrees. This allows the lamp when mounted on the wall to be used as an uplight or downlight or to emit lateral light. If the lamp is installed on the ceiling, it can either emit its light directly downwards or direct it to one side. This ceiling and wall light is available in pure white, deep black, cool brown, anthracite or space grey. The integrated LEDs can be dimmed on site and have a colour temperature of 3,000 Kelvin warm white. The Slat One with the IP65 protection class is well suited as an outdoor lamp because it is protected against water jets from any direction and dustproof. The satinised safety glass diffuser is particularly shock and impact resistant as well as insensitive to temperature differences.
