dimmable on site

Base / Socket

GY6.35

Dimensions

H 18,5 cm | Ø 7 cm

Description

The K-meral DAN pendant light is available in one-to-four-light - here with the design element "TIWI" as decor above the lampshade. The individual lampshades made of bisquit porcelain are elongated and nevertheless bulging. They are fluent in shape and the light, whose light cone is smaller and more punctual than CECIL, is also fluent. The circular canopy of the single-lamp light and the elongated ceiling housings of the multi-flames lamps are made of ground aluminum and have integrated transformers. This means that all DAN pendant lights can be dimmed on site.

By simply pushing the coaxial cable into the ceiling housing, the lamps can be individually adjusted in height. Supplied with 35 watt lamps. DAN is supposed to remind of a dewdrop, which has just sprung from the summer nightmare. Here these lamps are offered with "TIWI", a beautiful accessory above the lamp shade, which gives the light a very special touch. "TIWI" is made of aluminum and is cast in one piece in one elaborate process, then ground by hand and at last worked for days in a drum to obtain the perfect abrasion. TIWI is a loving detail that emphasizes the uniqueness of the series of lights thanks to its flame shape.
