Description

The spheres of the Foscarini Caboche Plus Terra Media are made of transparent polymethyl methacrylate and are available in the colours transparent or grey. They are arranged in a ring on the lamp shade, thus multiplying the light of the central light source and distributing it glare-free in all directions. The light is diffused maximally and without shielding by the zigzag shape of the mounting brackets. As soon as the spheres are attached to the lamp shade, the fixing brackets are no longer visible.

The Caboche Plus Terra Media floor lamp has a lamp base made of white lacquered metal with a base and three bows. Its lamp shade is 20 cm high and has a diameter of 50 cm. The floor lamp can be regulated via a dimmer on the plug lead. As illuminant, a powerful LED with a colour temperature of 2,700 Kelvin extra warm white is included. The larger Caboche Plus Terra Grande with a height of 178 cm is also available from the Caboche Plus series.
