<b>voltage suitability</b>	110 - 240 Volt
<b>material</b>	brass, nickel
<b>surface</b>	natural brass
<b>Wattage</b>	5.4 W
<b>light distribution</b>	room light
<b>Dimensions</b>	H 120 cm

#### Description

The Catellani & Smith Kyrie Eleison candle holder is a floor lamp constructed from an interwoven structure of flexible arms. There are eight arms that reach out of the wound light body. Likewise, the floor lamp ends below in eight feet that act together as a base.

The body of the Kyrie Eleison is made of brass with the surface natural. The flexible arms with the candles can be re-oriented, just as you like it. Thereby, the height of the candlestick is somewhat variable and is ca.120 cm. The eight candles are included, but can be of course also replaced. The light play with our modern conception of lighting and delight you with its classical illumination by candles.
