Technical details

Country of Manufacture	 Italy
Manufacturer	Luceplan
Designer	Alberto Meda, Paolo Rizzatto
Year of design	1985
Protection class / IP rating	IP20
Contents of the package	Leuchtmittel/Bulb
voltage suitability	110 - 240 Volt
material	aluminum, nylon
Base / Socket	GY6.35
Switchability	on the light head
Power (max. Watt)	10 Watt
Arm length	80 + 30 cm
lamp stand dimensions	15 cm
light head dimensions	10 cm
light distribution	directly

Description

The Luceplan Berenice Terra floor lamp is equipped with two mobile light arms, which can be freely rotated and swiveled. This lamp is offered in different surfaces and with different reflector colours. The reflectors in yellow, sage green, rose or satin white are made of glass, the reflectors in aluminum, brass and black are made of metal. The light is emitted mainly directly, depending on where the light arm is rotated. Only a small portion of the light is directed into the room for the variants with glass reflector through the reflector.

There is an on / off switch on the light head. Since the current is directed through the lighting rods to the light head, no cable in the lighting rods are seen. The light can be operated with halogen lamps or LEDs. The lamp was designed in 1985 by Alberto Meda & Paolo Rizzatto.
