Dimensions H 66 cm | Ø 110 cm

Description

The Luceplan Hope Suspension 110 has a diameter of 110 cm and a height of 66 cm. This makes it the second-largest lamp in this series. Like the other pendant lights, it is equipped with a three-dimensional steel structure with transparent arms arranged on it. On the arms Fresnel lenses are placed, which break the light like glass and create impressive reflections on the walls.

The cable length is at maximum 410 cm and can be shortened if necessary. Francisco Gomez Paz and Paolo Rizzatto created the Hope series after inspired by the famous Hope Diamond, one of the most expensive diamonds in the world. Since 2009, the series has already won numerous prizes, among others the Red Dot Design Award and the Compasso d'Oro ADI. Apart from this medium-sized pendant lamp also other sizes are offered.
