Description

The Oluce Plume 159 wall lamp is flexible and can be repositioned at any time. It has a lamp arm that can be swivelled at an angle of approx. 160 degrees. Its lamp shade can also be rotated. This wall lamp has a total depth of 160 cm and is made of metal and anodised bronze. The lamp shade folded in the middle emits direct light. The Plume 159 is regulated by an on/off switch on the supply line. Halogen lamps or LED retrofit lamps can be used as illuminants.
