Description

The Vistosi Bolle PL G is a ceiling lamp with a shade made of mouth-blown crystal glass. The baloton technique is used for the processing, whereby air bubbles are enclosed into the glass for a special texture. This texture multiplies the reflections on the surface of the shade and creates a halo effect on the ceiling around the lamp. The Bolle PL G ceiling lamp is available in crystal transparent and white. The metal parts of the lamp are satin nickel-plated in both versions. This light can be operated also with E27 LED retrofit lamps.
