## Description

The Serien Lighting Curling Ceiling Acryl clear S directs its light evenly downwards and to the sides. The ceiling light is available with a colour temperature of 2,700 Kelvin extra warm white, 3,000 Kelvin warm white or with dim to warm function. When dimmed, the lamp with dim to warm function imitates the dimming behaviour of classic incandescent lamps, which is perceived as pleasant. When dimmed down, the light not only becomes darker but also changes its colour temperature. As a result, the colour temperature changes from 1,800 Kelvin extra warm white to 3,000 Kelvin warm white.

The Curling Ceiling Acryl clear S has a diameter of 16 cm and a height of 9 cm. The Curling ceiling lamp with a clear acrylic shade is also available with a shade diameter of 25 cm.
