Description

Through the reflector of this Serien Lighting Curling Ceiling acrylic lamp, the light is emitted directly downwards and softly diffused all around. The ceiling light has a diameter of 22 cm and a height of 11 cm. It is available in three versions: with a colour temperature of 2,700 Kelvin extra warm white, 3,000 Kelvin warm white or with dim to warm function. When dimmed, the lamp with dim to warm function imitates the dimming behaviour of classic incandescent lamps, which is perceived as pleasant. When dimmed down, the light not only becomes darker but also changes its colour temperature. Thus, the colour temperature changes from 1,800 Kelvin extra warm white to 3,000 Kelvin warm white. In addition to this ceiling lamp, the Curling Ceiling Acryl clear / conical opal S with a shade diameter of 16 cm is also available.
