### Description

The Akari Benice small is a rectangular wall lamp made of matt stainless steel. The light is emitted from the lamp upwards and onto the wall, creating a cone of light on the wall. The Benice is reminiscent of a cube, but is not completely square. It is 8 cm wide and 13 cm deep. Its height is 9.3 cm. The different side lengths give the wall lamp a certain extravagance, which is also reflected in the unusual light design. A protective glass is integrated above the light source. The Benice small is operated with an integrated LED. The LED has an output of 8 watts and a colour temperature of 2,700 Kelvin extra warm white. In addition to this wall lamp, Akari also offers a larger lamp from the series with a width of 13 cm and a height of 15.1 cm.
