Description

The Avion wall lamp by the German manufacturer Gera Leuchten has a 4-stage swivel range that allows the emitted light to highlight different wall areas depending on the setting. In four selectable steps (4-stage by 69 degrees), the LED lamp can be adjusted to illuminate wall areas of different sizes underneath it. This wall light is in the surface aluminium-coloured. The Avion wall lamp by Gera Leuchten is 120 cm long, 8.8 cm wide and 4 cm high. The lamp connection is located in the centre, directly at the connection terminal. The lamp can be dimmed and the colour temperature adjusted from 2,700 Kelvin extra warm white to 6,000 Kelvin cool white via an integrated microknob switch. The scope of delivery also includes a two-metre plug-in cable.
