Description

The Betec Clarus picture light is offered here with a length of 86 cm and a projection of 22 cm (bracket type 22). The lamp head can be rotated around its own axis so that it can well illuminate and highlight a picture without glare. This makes the lamp ideal for illuminating pictures, menus and music stands. The high constant light output with low power consumption and extremely long service life are ideal prerequisites for modern picture lighting.

The Betec Clarus 86 cm is available in the surfaces brass glossy, brass matt, chrome, nickel glossy, nickel matt, burnished, black matt, gold glossy and gold matt. For the production, the German manufacturer Betec uses high-quality brass and processes it with craftsmanship. The lamp is delivered including a mounting set, with which the lamp can easily be mounted directly on a picture or on the wall. As standard, the picture light is available with a colour temperature of 2,700 Kelvin extra warm white. On request, it is also offered with 2,400 Kelvin extra warm white, 3,000 Kelvin warm white or 3,100 Kelvin white. The integrated, dimmable LED is characterised by very good colour rendering with a high colour rendering index of Ra >90. A touch dimmer is offered as an accessory, with which the lamp can be switched and dimmed by touch. Lamps from the Clarus series are also offered in ten other lengths and with a projection of 11 cm or 17 cm.
