Temperatura de color en grados Kelvin	2.700 extra blanco cálido
Índice de protección / Protección IP	IP20
Contenido del paquete	Leuchtmittel+Treiber/Bulbs+Driver
entrada de tensión	110 - 240 Volt

Descripción

The halogen light source of the Ingo Maurer lights is unfortunately no longer offered by the manufacturer.

Conversion to LED technology is unavoidable if the lamp continues to be used, due to the design!

This conversion kit is suitable for converting the following lamps from the BIRDIE series by the manufacturer Ingo Maurer from the previously used halogen light sources to modern LED technology. The conversion kit consists of the transformer/driver required for the conversion and the corresponding LED light sources.

- Version 1 - Birdies Busch 230V - Number of light sources 7, number of drivers 1
- Version 2 - Birdie 230V - Number of light sources 12, number of drivers 1
- Version 3 - Birdie's Nest 230V - Number of light sources 10, number of drivers 1
- Version 4 - Birdie's Ring 230V - Number of light sources 12, number of drivers 1
- Version 5 - Birds Birds Birds 230V - Number of light sources 24, number of drivers 1

The conversion kit for the Birds Birds Birds 230V light model is only suitable for lamp models that were produced from 07/2002 and have 5 transformer rings. For Birds Birds Birds 230V models produced before 06/2002 and with 4 transformer rings, conversion to LED technology is unfortunately not possible.
