

Serien Lighting

SML Wall silver Large satinee-satinee

Technical details

País de origen	 Alemania
Fabricante	Serien Lighting
Diseñador	Jean Marc da Costa
Índice de protección / Protección IP	IP20
Contenido del paquete	Leuchtmittel/ bulbs
entrada de tensión	230 - 240 Volt
Profundidad en cm	9
material	aluminio, vidrio
Atenuación	Regulable en el sitio
Base / Portalámparas	R7s
Alimentación (máx. Watt)	160 Watt
Versión	Large
Cubierta de la luz	satinado / satinado
Dimensions	H 3 cm L 17 cm

Descripción

The Serien Lighting SML Wall wall lamp has a silver alu surface which is anodized. The lamp has a consistent design which has pared its dimensions down to 25 mm in height. The two different illuminant covers, which can be freely chosen for top or bottom, allow the light to be directed individually. One cover emits the light symmetrically scattering upward and downwards (satinee/satinee) and the other cover emitted the light in one direction and shielded it to the other side (satinee/raster). The satinized cover lets the light pass but the black raster cover blocks it almost completely.

This SML wall lamp is the halogen version of the series. Apart from this, also an LED lamp is available. The light is offered in three sizes: Small with 85 mm, Medium with 130 mm and Large with 170 mm. Wall reflectors and mirror adapters are also available as accessories. The lamp exploits its strengths anywhere an opening in the wall is possible but there is no desire or space for expressive lighting fixtures. Be it along a long corridor, by or on a mirror or in the kitchen.
