## Descripción

The Serien Lighting Curling Suspension Tube Acryl clear / conical opal S directs its light downwards and diffuses it softly all around through the reflector. During assembly, its total height can be customised individually. The total height of the pendant lamp is 110 cm. Its clear acrylic lamp shade has a diameter of 16 cm and a height of 6 cm.

The Curling Suspension Tube Acryl clear / conical opal S is available in three versions: with a colour temperature of 2,700 Kelvin extra warm white, 3,000 Kelvin warm white or with dim to warm function. When dimmed, the lamp with dim to warm function imitates the dimming behaviour of classic incandescent lamps, which is perceived as pleasant. In this way, its light not only becomes darker when dimmed down, but also changes its colour temperature. This changes from 1,800 Kelvin extra warm white to 3,000 Kelvin warm white when dimmed. Besides this lamp, Serien Lighting also offers the Curling Suspension Tube Acryl clear / conical opal M with a shade diameter of 22 cm.
