Descripción

The Knapstein LINDA-132 is a pendant lamp with a length of 132 cm. Its total height can be adjusted between 73 cm and 180 cm at any time by pulling or lifting the lamp itself. The lamp can also be suspended at an angle. This pendant lamp radiates its light both upwards and downwards. The uplight and downlight can be switched separately by gesture control and also infinitely dimmed. In addition, the light colour can be adjusted to a warmer tone (from colour temperature 3,000 Kelvin warm white to 2,200 Kelvin extra warm white). All dimming and light colour settings are saved via the memory function and are automatically reset the next time the light is switched on. The sensor area for gesture control is located centrally on the lamp.

The lamp is switched on and off by a wiping hand movement in the sensor area. If the hand is held longer in the sensor area, the light intensity can be varied. By holding the hand in the sensor area again for a longer period of time, the desired light colour can also be set. The LINDA-132 is available in matt nickel, black or bronze effect. The series also includes the LINDA with a length of 92 cm, 112 cm and 152 cm. On request, the LINDA is also available in other lengths or surfaces.
