Descripción

The Loom Design Saga wall lamp emits its light simultaneously upwards and downwards. The optical lenses focus the light in both directions and emit it onto the wall in contoured cones of light. Above each lens sits a clear, spherical glass. An internal reflector additionally prevents glare. The light is emitted upwards and downwards with a beam angle of 80 degrees each. The Saga has a width of 10.5 cm and a depth of 12 cm. The height is also 12 cm. An LED with a colour temperature of 2,700 Kelvin extra warm white is integrated as illuminant. The wall lamp is offered in the surfaces white, black and corten. With the IP65 protection class, this Loom Design lamp is ideal as an outdoor lamp, as it is dustproof and protected against water jets from any angle.
