matériel

acier Inoxydable

Dimensions

H 8 cm

Description

The Keilbach Script letter series consists of letters, numbers and special characters made of high-quality stainless steel. So you can place words, hints, sentences or even whole quotations on the house wall.

The letters, numbers and special characters come from the font family "Eurostile" and were designed by the typographer Aldo Novarese. The characters are approx. 8 cm tall with a material thickness of approx. 2 mm.

They are simply stuck on and can be used on the many substrates - both inside and outside. Stencils for a well aligned typeface are included.

There are offered

the letters A - Z, Ä, Ö, Ü

the digits 0 - 9

and the special characters +, -, (dot), (comma).

Please note that the price refers to a letter or a number or a special character.

When ordering, please let us know in the "Comment" field which characters and how many you require.
