Description

The Catellani & Smith Miracolo is a candlestick with a flex structure as light arm. This flex structure can be shaped and stretched as desired. At one end of the structure of the candle stick, a holder is located with a wax candle, at the other end, a fake pressure switch is attached. Whether the candle so that can turn on and off, you may like to try.

The height of Miracolo table lamp is through the flex structure variable, up to 30 cm can be achieved. The length of the flexible lamp arm is 75 cm. The candlestick is in natural brass.
