Description

The Nyta Tilt Globe Wall Short is a wall lamp with a rotating shade. The shade can be rotated by 360 degrees, which allows the light distribution to be readjusted again and again. The shade of this lamp is made of matt lacquered aluminum and is available in the following surfaces: white, black and grey. From the inside, the shade is always white. The wall bracket has the same surface as the shade. This wall light is mounted directly on the power outlet, on request it is also available with cable. The cable colours black, white, grey, red, light blue and light green are optionally available. An on/off switch is integrated on the wall bracket. The wall light can be operated with LED retrofit lamps or halogen lamps.
