Casambi DALI Dimmer module

Technical details

Pays de fabrication	 Italie
Fabricant	Stilnovo

Description

The Stilnovo Casambi DALI dimmer module is used to regulate LEDs via an app for your smartphone or tablet (IOS, Android) via Bluetooth. LED lights suitable for DALI dimmers can be continuously dimmed in brightness with the free Casambi App. Individual lighting scenarios can also be set.

New lighting is automatically detected. An additional gateway is not required. The Casambi App functions as a user interface, commissioning tool and remote gateway. The Casambi module can also be controlled via existing light switches.
