### Description

The Stilnovo Gobo Filter is an accessory for the 2Nights W1 and W2 wall lights. These filters can be mounted in the upper opening of the wall lights to project light plays onto the wall. The different filters create light effects reminiscent of fire, trees or water. The Gobo Filter is available in white and black finishes. Furthermore, this accessory is offered in three versions:

- Version 1: Fire
- Version 2: Tree
- Version 3: Water
