Description

The lamp shade of the Vistosi Cloth SP G pendant lamp seems to be made of pleated fabric, but is actually made of mouth-blown glass. The lamp is available in two shade colours: white matt and metallized. The metallized shade has a chrome coating, which makes it look metallic when switched off. When switched on, it looks dark beige. In the white matt version, the light is emitted both through the shade as well as downwards. In the metallized version, the light only radiates downwards. In both versions, a milk-white diffuser diffuses the light emitted downwards and scatters it evenly.

The Cloth SP G is available in two versions: a halogen E27 version and an LED version. The halogen E27 version can be operated with halogen lamps or LED retrofit lamps. The LED version has an integrated LED with a colour temperature of 2,700 Kelvin extra warm white and is dimmable with a trailing edge phase dimmer. On request, it is also available with a colour temperature of 3,000 Kelvin warm white or 0-10 Volt dimmable. The 0-10 volt dimmable version requires a 5-core mains cable. The cable with a maximum length of 200 cm can be shortened if required. With the supplied ceiling hook, the pendant lamp can also be mounted independently of the power outlet.
