## **Description**

The Knapstein LARA-L205 is a height-adjustable and length-variable pendant lamp. By pulling or lifting the lamp, the total height of the lamp can be adjusted between 73 cm and 180 cm at any time. Its length can be adjusted between 107.4 cm and 205 cm by pulling or pushing the outer rails. The pendant lamp emits light upwards and downwards at the same time. Using gesture control, the uplight and downlight can be separately switched as well as dimmed continuously. The sensor area of the gesture control is located on the top of the middle pendulum rail. A wiping hand movement in the sensor area switches the light on and off. If the hand is held in the sensor area for a longer time, the light intensity can be adjusted. A memory function saves the last light intensity setting and automatically selects it the next time it is switched on. The lamp is available matt nickel and black. No visible screws are visible in the ceiling canopy, as the ceiling canopy is held by magnets. This pendant lamp is also available as LARA-L134, which is adjustable in length between 72.5 cm and 134.5 cm. On request, the LARA is also available in other lengths or surfaces.
