Description

The Grupa Baluna Wall Long is a wall lamp with an extendable arm. The reach of the lamp can be adjusted between 118 cm and 190 cm by extending the arm. The lamp arm can be swivelled by 180 degrees. In addition, the wall lamp can be adjusted in height between 32 cm and 57 cm. The Baluna wall lamp has a lamp shade made of triple-coated, mouth-blown opal glass. This glass shade can be rotated 360 degrees around its own axis. It has a diameter of 19.7 cm. A cord dimmer is integrated.

The lamp arm and wall bracket are made of black, powder-coated steel. They are finished and assembled by hand. The lamp is also available in other finishes on request. The Baluna Wall Long is connected via a supply cable. In addition to this extendable wall lamp, the Baluna Wall Medium with a fixed projection of 51.5 cm is also available.
