

Bover

Anchoring for foundation-cornet-b-27-b-52-b-77

Technical details

Pays de fabrication	 Espagne
Fabricant	Bover
matériel	acier

Description

If you want to anchor the lamp reliably in the concrete, the use of a foundation anchor is practically indispensable. This way, the construction gets the right hold to be armed against loads (e.g. by wind). With this foundation anchor, the outdoor lamps Bover Cornet B/27 Outdoor, B/52 Outdoor and B77/Outdoor can be firmly anchored in the foundation.
