Technical details

Pays de fabrication	 Allemagne
Fabricant	Anthologie Quartett
Créateur	Michael Topor
année	2003
Indice de protection / Indice IP	IP20
Contenu de la livraison	Leuchtmittel und Kerzen/Bulb and candles
aptitude de tension	110 - 240 Volt
matériel	cristal verre, Fer, laiton
atténuation	dimmerable sur place
Socle / Douille	B15d
Les performances du système	10 x 40 Watt (max.)

Description

The Anthologie Quartett Jahreszeiten Sommer (Seasons Summer Pendant Lamp) is a chandelier with a combination of real candles and electric lamps. This Jahreszeiten lamp features small, hand-cut crystal glasses and large, dark green leaves made of patinated brass as design elements. The metal structure made of iron is available in the surfaces bronze brown, gold, silver or white. A chrome finish is also available on request. At the end of the supplied canopy is a 10 cm long S-hook. A 40 cm long S-hook is hooked into this to suspend the lamp from the ceiling. The suspension cannot be shortened by the user. Other lengths for the included 40 cm long S-hook are also available on request.

The Jahreszeiten Sommer Pendant Lamp is offered in three sizes: with a diameter of 50 cm, 70 cm or 90 cm. The diameter of the lamps is approx. 50 cm, 70 cm or 90 cm respectively. Depending on the size, the crystal glasses and leaves are distributed in different arrangements on the metal structure.

In the 18th century, the Montgolfier brothers caused a sensation with the first flight in a hot air balloon. Thus, lamps with a semicircular shape in the lower segment were created at that time. The chandelier series Jahreszeiten is inspired by this Montgolfier style, which gave the chandelier its bulbous shape in its lower third. The symmetrical arrangement of the electric arms and forged candle holders give the lamp a modern design language. From the collection, further chandeliers with different crystal sizes and partly with different foliage made of patinated brass are offered.

Note: The use of retrofit sockets (B15d) allows the use of state-of-the-art light sources in the future (halogen lamp, LED). In terms of sustainability, the lamp can therefore shine in its light for many years to come.
