### Description

The Licht im Raum Ocular 1300 LED pendant lamp has a diameter of 130 cm. The lamp can be individually set in total height during installation. The ten lenses of the pendant lamp have a diameter of 67 mm each and can be swivelled. The Ocular lenses focus and control the light in a precise, glare-free manner, creating a superior quality of light. The light is focused by ten long-life LEDs through the lenses and emitted homogeneously downwards. Five additional LEDs also distribute light upwards.

The Ocular 1300 LED is available in the surfaces brushed stainless steel, hand-polished stainless steel, matt black, white, natural brass and black / gold. The pendant lamp can be regulated via a rotary dimmer.
