La collezione prende ispirazione dal design rigoroso di linee e superfici del minimalismo dei primi anni '60. Forme regolari si contrappongono a elementi più morbidi attraverso il sapiente uso delle finiture metalliche e la lavorazione del vetro. La struttura è stata pensata per consentire grande flessibilità grazie al sistema di aggancio dei frame metallici, che, scorrendo, creano geometrie sempre nuove. I diffusori sono disponibili in finitura bianco sfumato o satinato, mentre la struttura in metallo è proposta in finitura antracite o bronzo opaco.

The collection is inspired by the rigorous design of lines and surfaces of early 1960s minimalism. Regular shapes are contrasted with softer elements through the skillful use of metal finishes and glass fabrication. The structure has been designed to allow great flexibility thanks to a system of fixing of the metal frames, which, by sliding, create ever new geometries. The diffusers are available in shaded white or matt finishes, while the metal frame is offered in anthracite or matt bronze finishes.
