Omschrijving

The Byok Nastrino USM-adapter is a table lamp, characterised by its functionality. High-quality LED technics, combined with two dazzle-free light zones, create the ideal working light. This is underlined by the well-designed joint technics, used with the Nastrino USM-adapter.

The design is very nice as well, because this lamp consists of simple ground aluminium profiles. There are offered these surfaces: aluminium matt and matt black. Byok offers this lamp also with a table clamp, table stand, rotating base and wall lamp as well. This lamp is dimmed with gesture control. During dimming thanks to the Dim2Warm technology, the light takes on a warmer colour, changing the light colour of the LEDs from 2,700 Kelvin extra warm white to 2,100 Kelvin warm white.
