Omschrijving

The Catellani & Smith Francesca is a wall lamp with a circular diffuser as a shade. This diffuser is mounted with a ledge of approx. 12 cm to the wall, so that the light of the lamp is emitted onto the wall and reflected from there into the room. This light is available in four different surfaces: gold leaf, copper, white varnished and silver leaf.

It applies for each colour, that the back is held in the same colour as the front side. Only in the white version, the back is held in gold, so for this version one special light effect is created. The wall lamp itself is made of aluminum, the wall mount with the dimensions $12 \times 11.5 \, \mathrm{cm}$ of iron. As bulbs exchangeable LED retrofits are suitable. The Francesca is available in two different sizes: with a diameter of 80 or 120 cm. The lamp is on site dimmable.
