### Omschrijving

The Stilnovo Diphy FL floor lamp has a diffuser on a curved light rod and emits its light both downwards and upwards. The diffuser of the arc lamp appears transparent when switched off, a dot pattern becomes visible on the diffuser when switched on. This dot pattern is laser-engraved during production using OptiLight technology and is based on the Asian flower *Diphylleia Grayi*, from which the Diphy lamp series takes its name. The floor lamp can be regulated by a push dimmer on the supply line. The last brightness level set is stored by the memory function and automatically selected again the next time the light is switched on.
