Omschrijving

The Ingo Maurer Oops is a wall lamp with a light source in the lower part. The light source illuminates the upper part of the spiral-shaped lamp body, from where the light is reflected into the room. This creates numerous light and shadow effects on the lamp and the wall behind it. At the same time, the light radiates diffusely into the room through the transparent light body itself. The lamp body of the Oops is made of high-quality, fine paper from the handmade paper manufacturer Gmund and conceals both the wall bracket and the light source. The 200 cm long cable is supplied with plug and dimmer switch. Both halogen lamps and LED retrofit lamps are suitable as light sources.
