Omschrijving

The Holtkötter Lence wall lamp emits light both downwards and upwards. The emitted light is refracted in both directions by a lens and evenly distributed. A part of the light is emitted both at the top and at the bottom of the wall and reflected from there into the room. Holtkötter's Lence is available in platinum, matt aluminum and polished aluminum. Two replaceable LEDs, each with a colour temperature of 2,700 Kelvin extra warm white, are integrated as illuminants. The wall lamp can be dimmed on site.
