Omschrijving

The Serien Lighting Draft Ceiling S is offered with the glass colours clear, brown and blue. Within the glass, a conical reflector made of opal acrylic glass is integrated for this ceiling lamp. Through the reflector, the emitted light is softly diffused all around and at the same time directed directly downwards. The light is emitted softly and evenly.

The Draft Ceiling S is 24 cm high and has a diameter of 26 cm. As standard, the ceiling light is supplied with a colour temperature of 2,700 Kelvin extra warm white; on request, it is also available with 3,000 Kelvin warm white or with dim to warm function. The versions with dim to warm function imitate the dimming behaviour of classic incandescent lamps, which is perceived as pleasant. When dimming, the colour temperature of this version changes from 1,800 Kelvin extra warm white to 3,000 Kelvin warm white.
