### **Omschrijving**

The Grupa Arigato Ceiling Double is a ceiling light with two rotating and swivelling joint arms that can be adjusted independently of each other. This is the smaller of two ceiling lights with two jointed arms. Each jointed arm consists of two parts, each 35 cm long. Each lamp shade can be rotated 360 degrees and swivelled 125 degrees. The lamp is mounted directly on the ceiling. Thanks to diffusers at the bottom of the lamp shades, the light is emitted downwards without glare. The Arigato Ceiling Double is available with a black or white matt powder-coated finish. On request, the lamp is also offered in other finishes. This ceiling light by Grupa can be operated with halogen lamps or LED retrofit lamps. The Arigato Ceiling Double Long with two longer jointed arms and the Ceiling with a single jointed arm are also available from the series.
