

Bopp

At Pendant Lamp 70

Oberfläche

- aluminium
- wit

Dimmbaarheid

- dimbaar met fase- en fase-afsnijding en fase-regelingsdimmer
- met Casambi module
- met ZigBee module

Technical details

Land van herkomst	 Duitsland
Fabrikant	Bopp
Beschermingsklasse / IP-bescherming	IP20
Leveringsomvang	LED
voltage geschiktheid	230 - 240 Volt
materiaal	aluminium
Hoogte-instelling	hoogte bepaalbaar
Wattage	32 W
LED	inclusief
Kleurweergave-index	90
Lichtstroom in lm	4.400
Kleurtemperatuur in Kelvin	2.700 extra warm wit
luifel Dimensions	21 cm
Schaduw diameter	70 cm
totale hoogte	max. 140 cm

Omschrijving

The Bopp At is a spirally curved pendant lamp with an integrated LED. The LED runs completely around the inside of the curved lamp. This illuminates the lamp itself and at the same time emits warm white light all around. The integrated LED with an output of 32 watts has a colour temperature of 2,700 Kelvin extra warm white. This LED pendant lamp made of aluminium has a diameter of 70 cm and is suspended with three cables from a canopy with a diameter of 20.6 cm and a height of 4 cm. The round ceiling canopy of the Bopp pendant lamp At has the same surface as the lamp. The height of the pendant lamp can be adjusted by shortening the cables to a maximum height of 140 cm from the ceiling to the lower edge of the lamp. The At pendant lamp by the German manufacturer Bopp is available in the surfaces polished aluminium and white. The lamp is available in three versions: dimmable via the existing household electrical system with a trailing edge and / or leading edge phase dimmer (not included in the scope of delivery), with Casambi module or with ZigBee module. With a Casambi module, it is possible to operate the light via smartphone or tablet using the Casambi app via Bluetooth. Casambi technology also offers the option of switching the lamp on at specific times via a timer. ZigBee enables wireless communication via WLAN between a Smart Media device and existing home technology. Using ZigBee, lamps, electric shutters, heating and loudspeakers, among other things, can be controlled via voice control.
